ndia will once again be among the world's fastest growing economies, but the Reserve Bank of India (RBI) and the government

"We are on course to becoming among the fastest growing economies of the world, but there is far to go," Patra said in his speech, adding that private consumption and investment remains a work in progress, while the restoration of livelihoods and the revival of MSMEs is a "formidable task that lies ahead."

The RBI remains committed to revive and sustain growth on a durable basis and continues to mitieconomy, while ensuring that infla-

tion remains within the target going atorium on repayments, and openforward," Patra, who is in charge of ing special liquidity help to individmonetary policy and a member of the Monetary Policy Committee (MPC), said in his speech. The MPC will meet next on February 7-9.

While employment is yet to recover fully, and labour participation remains low, bank credit is picking up as stress in banks' balance sheets eases. Inflation is now at a more tolerable level for the RBI, "although it remains elevated amidst high commodity prices, including of crude," Patra said.

The central bank adopted various conventional and unconventional gate the impact of Covid-19 on the measures to ease the pandemic's impact. Apart from extending a mor-

uals and small businesses, the RBI's liquidity operations brought down borrowing cost for the government to a nearly 17-year low, despite record borrowing numbers, and softened the borrowing cost for private companies too.

Some of the measures began even before the pandemic, as the central bank anticipated stress, Patra said as an RBI insider privy to the reasoning behind the steps and 13 pandemic speeches of RBI Governor Shaktikanta Das.

Overall, liquidity augmenting measures worth ₹17.2 trillion (8.7 per cent of nominal GDP of FY21) were announced since February 6, 2020. The policy reporate was lowered by an unprecedented 115 bps in two phases, aside from a whole host of measures taken by the RBI.

"I would not hazard the audacity of anticipating the judgment of history, but today, India is much better placed to deal with future waves of the pandemic relative to the first wave," the deputy governor said.

"THE RBI REMAINS COMMITTED TO REVIVE AND SUSTAIN GROWTH ON A DURABLE BASIS AND CONTINUES TO MITIGATE THE IMPACT OF COVID-19 ON THE ECONOMY, WHILE ENSURING THAT INFLATION REMAINS WITHIN THE TARGET GOING FORWARD'

Vittal said Airtel was spending \$2.5 billion each year on capex and would continue to invest in areas like home broadband. data centres, and 5G services. "This (Google investment) will fire up our digital agenda. And that's where we will double down and really go deep," he said. He added the company had a comfortable leverage situation and was generating adequate cash flows.

Vittal said there would be no conflict due to Google's investment in Jio.

Maharaja...

"We worked with JRD Tata and it was an absolutely fabulous experience in terms of the way we were trained and the relationship between the crew. The standards fell later, but I hope now with the Tatas taking over, they'll improve," she says.

Things took a turn for the worse in the 1980s, when the civil aviation ministry appointed officials to run the merger of Air India and Indian Airlines, the entity became a subsequent losses every year.

"From 1953-1978, Air India was still a government airline and was doing exceedingly

it is not government ownership that comes in the way of efficient functioning of an airline but the kind of leadership that is provided," says Jitender Bhargava, former executive represented foreign travel," director, Air India and author of The Descent of Air India.

Going forward. Bhargava says the Tatas need to concentrate on three Ms to turn the airline around: Manpower, Machinery, and Marketing.

The much talked about excessive manpower is not an issue. "The Tatas need it. The pilots and aircraft engineers are trained, and the cabin crew are qualified," he says. "All they need is proper leadership. A surplus in manpower gives them the scope of expanding their operations, thus optimising operations of men and machines.'

"Air India was saddled with a bureaucrat. I am happy that the government of India can no longer appoint a person of its choice to run it; the Tatas will run it professionally," says Bhargava.

A brand strategist who does not wish to be identified lists another alphabet, the three Es, for the Tatas to concentrate on: Engineering, Experience, and airlines. In 2007, with the Eat, He explains: The planes need to be refurbished and safe. The experience, right from loss-making venture, posting the booking process to checkin and boarding, needs to be flawless, made easier and requires an overhaul. The food has to be better and the liquor

"Air India was the symbol of Indian aspiration and was always more glamorous than its domestic counterpart since it says Samit Sinha, founder, Alchemist Brand Consulting. Delhi, "While the brand has certainly eroded, there is a residual brand equity in the airlines," he says. However, no amount of imagery can restore a bad product, so the Tatas have a serious job at hand.

"Their product and all the

services that come with it have to be top-notch," says Sinha. "They are already very good with things like pilot experience and managing large-scale logistics, but it has to be very competitive in terms of punctuality, efficiency, and prices," he adds. Still the only carrier with the country's name, which Sinha says is a huge opportunity, "it carries all the pride and emotion. It has a legacy. People do have some amount of affection left for the airline. It is common to hear that while they may not be the most punctual, they give greater on-board comfort. They are not mercenary in terms of leg room." He adds, "It has a lot of potential."

NPAs...

"We expect that the final number will be somewhere around ₹1.5 trillion," the SBI chairman said.

While assets worth ₹83,000 well, which clearly means that cannot be bad. Ambience alone crore have been identified so

are no more accounts that could be transferred. For the remaining accounts, the process is still on and this will probably happen over the next year in a phased manner, he said. SBI is the lead bank in 12 of the 15 cases identified for the first phase. The bank will see a transfer of loans worth ₹20,000 crore to NARCL.

SBI, Union Bank of India and Indian Bank hold 13.27 per cent stake each in NARCL, while PNB owns close to 12 per cent. "The principal agent relationship is only to the extent of entering into an arrangement between NARCL and IDRCL. And, when it comes to the ability to have the accounts resolved, IDRCL will have full freedom." Khara further said.

"IDRCL is expected to bring in superior resolution techniques, preserve the value, showcase the brownfield assets, and attract domestic as well as foreign investors and AIFs. This will maximise the value for all the stakeholders. It is also expected to free the bandwidth as well as capital for the lending bankers, which can be put to more gainful use," Khara said.

Yield spread...

This is not unreasonable given the historical trend in the yield spread between India's and US' 10-year Treasury bonds. The spread widened to around 550 basis points (bps) in March and

does not make the experience. far, this does not mean there April 2020 and then it contracted to 440 bps as the Fed and the RBI flooded the markets with record liquidity.

In the past, the yield spread had shown the tendency to widen in the event of a monetary tightening by the Fed. For example, the yield spread widened from 400 bps in January 2010 to a high of 700 bps by May 2012 as the Fed tightened its monetary policy, leading to a small decline in its balance sheet.

These are the challenges on which Nageswaran will have to advise the finance minister and the government.

Those who have known and worked with Nageswaran say his biggest task will be to provide ideas to the government which are actionable. One such person, who did not wish to be identified, told Business Standard that Nageswaran is a data-oriented academic who is open to new ideas and opposing views. The person said Nageswaran "puts in a lot of hard work in trying to understand the nuts and bolts of an issue". In a recent newspaper article. Nageswaran said while an average 9 per cent real GDP growth can be assumed for India in 2021-22 and 2022-23. inflation will remain a concern due to elevated crude oil prices.
